

THE ULTIMATE FAT LOSS PROTOCOL

14-DAY HOURGLASS DIET SYSTEM

A professionally designed nutrition system for caloric deficit, eliminating water retention, reducing waist size, and creating a flat stomach without feeling hungry.

HOW TO USE THIS GUIDE

This 14-day cycle is your master framework. Do not stop after Day 14. To reach your goal weight (50-55 kg) and build an extremely snatched waist, simply loop this protocol: after Day 14, go back to Day 1 and repeat these meals for 2-4 months until you achieve your ideal shape.

THE FLAVOR & SUBSTITUTION MATRIX

Bored of a specific food? Use this guide to swap ingredients while keeping your calories identical.

1. INGREDIENT SWAP GUIDE (GRAM FOR GRAM)

IF THE PLAN SAYS...	YOU CAN SWAP IT FOR...
Chicken Breast	→ Turkey Breast White Fish Shrimp Tofu
Lean Ground Turkey	→ Extra Lean Ground Beef (5% fat) Chicken Mince
Salmon Fillet	→ Trout Mackerel 2 Whole Eggs + 100g Chicken
Basmati Rice	→ Quinoa Buckwheat Brown Rice Couscous
Sweet Potato	→ Baked Pumpkin (double the amount) White Potato
Greek Yogurt (0%)	→ Low-fat Cottage Cheese Skyr
Almonds / Peanut Butter	→ Walnuts Cashews Almond Butter 1/4 Avocado

2. THE FLAVOR CHEAT CODES (ZERO CALORIES)

A. THE "NO-CALORIE" SAUCES

You don't need dry food. Use these freely: Yellow Mustard, Hot Sauce (Sriracha/Cholula), Soy Sauce (Low Sodium), Apple Cider Vinegar, Lemon/Lime Juice, and Balsamic Vinegar. Never use store-bought mayo or ketchup loaded with sugar.

B. OIL SPRAYS OVER POURING

A single tablespoon of olive oil is 120 calories. Instead of pouring oil into your pan, buy an Extra Virgin Olive Oil Spray. 2-3 quick sprays coat the pan perfectly and only cost you 10-15 calories. This saves you thousands of calories over a month.

C. SWEET TOOTH HACKS

Craving sugar? Buy zero-calorie Flavor Drops (Vanilla, Caramel, Chocolate) and add them to your oats, yogurt, or coffee. Use Stevia or Erythritol instead of sugar. Cinnamon naturally tricks your brain into tasting sweetness without adding a single calorie.

D. DRY SPICES ARE UNLIMITED

Smoked Paprika, Garlic Powder, Onion Powder, Cumin, Oregano, and Chili Flakes. Coat your chicken and fish in these before baking. It creates a massive flavor crust, increases thermogenesis (metabolism), and adds zero calories to your daily total.

PREPARATION PHASE

MASTER GROCERY LIST

Buy these items in advance to ensure you follow the menu flawlessly.

1. LEAN PROTEINS

Chicken Breast (Skinless, Boneless)	1.5 - 2 kg
Lean Ground Turkey (95% lean)	1 kg
Lean Flank Steak or Lean Beef (5% fat)	600g
White Fish (Cod, Tilapia, or Sea Bass)	800g
Salmon Fillets (Wild-caught)	500g
Shrimp (Peeled & deveined)	400g
Whole Eggs	2 Dozen
Liquid Egg Whites (Pasteurized)	1 Carton
Whey Protein Isolate	1 Tub
Greek Yogurt (0% Fat, Unsweetened)	3 Large Tubs

2. SMART CARBS

Old Fashioned Rolled Oats	1 kg
Basmati or Jasmine Rice	1 kg
Sweet Potatoes	1.5 kg
Quinoa	500g
Plain Rice Cakes	2-3 Sleeves
Sourdough Bread	1 Loaf
Whole Wheat Tortilla Wraps	1 Pack

3. HEALTHY FATS

Avocados (Firm and ripe, Hass)	4-5 pcs
Extra Virgin Olive Oil (Cold pressed)	1 Bottle
Raw Almonds or Walnuts (Unsalted)	300g
Natural Peanut or Almond Butter	1 Jar
Chia Seeds	1 Small Bag

4. FIBER & VEGGIES (UNLIMITED)

Fresh Spinach / Mixed Greens	3 Large Bags
Asparagus (Natural Diuretic)	3 Bunches
Broccoli & Green Beans	1 kg combined
Zucchini & Cucumbers	6-7 pcs each
Bell Peppers & Cherry Tomatoes	Assorted
Lemons (For dressing and water)	6 pcs
Fresh/Frozen Berries (Blue/Rasp)	500g
Green Apples (Granny Smith)	4-5 pcs

5. CONDIMENTS (ZERO CAL)

Himalayan Pink Salt & Black Pepper	Yes
Garlic powder, Paprika, Cinnamon	Yes
Hot Sauce / Sriracha (Sugar-free)	1 Bottle
Almond Milk (Unsweetened)	2 Liters

DAY 1

TOTAL: ~1250 KCAL | P: 120G | F: 44G | C: 95G

MEAL 1 (BREAKFAST)

2 Whole Eggs + 2 Egg Whites (scrambled) + 1 slice Sourdough Toast + 1/4 Avocado. Black coffee.

310 kcal P: 22g F: 14g C: 22g

MEAL 2 (LUNCH)

150g Grilled Chicken Breast + 50g Basmati Rice + 100g Steamed Broccoli + 1 tsp Olive Oil.

380 kcal P: 35g F: 8g C: 40g

MEAL 3 (SNACK)

1 Scoop Whey Protein Isolate mixed with water + 1 Green Apple.

210 kcal P: 25g F: 2g C: 25g

MEAL 4 (DINNER) - ZERO CARB

150g Baked Salmon + 150g Asparagus + Mixed Green Salad (lemon juice dressing).

350 kcal P: 38g F: 18g C: 8g

[PRO TIP] SUBSTITUTIONS & TASTE

Tired of chicken? Swap it for turkey or shrimp (150g). To keep the meat juicy without extra calories, marinate it in lemon juice and spices, and use olive oil spray to coat the pan. Add garlic powder and smoked paprika for massive flavor!

DAY 2

TOTAL: ~1280 KCAL | P: 118G | F: 35G | C: 120G

MEAL 1 (BREAKFAST)

150g Greek Yogurt (0%) + 50g Berries + 1 tbsp Chia Seeds + 1 tsp Honey.

240 kcal P: 18g F: 6g C: 28g

MEAL 2 (LUNCH)

150g Lean Ground Turkey + 150g Baked Sweet Potato + Zucchini/Cucumber side salad.

410 kcal P: 34g F: 10g C: 38g

MEAL 3 (SNACK)

2 Plain Rice Cakes + 1 tbsp Natural Peanut Butter + 1 Scoop Whey Protein (in water).

320 kcal P: 30g F: 9g C: 22g

MEAL 4 (DINNER) - ZERO CARB

150g White Fish (Cod) + 150g Green Beans + 1 tsp Olive Oil.

310 kcal P: 36g F: 10g C: 12g

[PRO TIP] SUBSTITUTIONS & TASTE

Swap Greek yogurt for 0% cottage cheese or Skyr. If you have intense sugar cravings, add a few drops of liquid stevia and cinnamon to your yogurt—it completely kills the urge for sweets. Sweet potatoes can be swapped for regular baked potatoes or brown rice.

DAY 3

TOTAL: ~1310 KCAL | P: 125G | F: 51G | C: 78G

MEAL 1 (BREAKFAST)

40g Rolled Oats (cooked with almond milk) + 1 Scoop Whey Protein + Cinnamon.

290 kcal P: 30g F: 5g C: 30g

MEAL 2 (LUNCH)

Shrimp Wrap: 120g Grilled Shrimp + Spinach + 1 Whole Wheat Tortilla + Light hot sauce.

340 kcal P: 30g F: 8g C: 35g

MEAL 3 (SNACK)

2 Hard-boiled Eggs + Carrot & Cucumber sticks.

180 kcal P: 14g F: 10g C: 8g

MEAL 4 (DINNER) - ZERO CARB

150g Lean Flank Steak + Large Spinach Salad + 1 tsp Olive Oil & Lemon dressing.

500 kcal P: 51g F: 28g C: 5g

[PRO TIP] SUBSTITUTIONS & TASTE

Oatmeal can be swapped for buckwheat or quinoa flakes. Use a regular thin pita instead of a tortilla for the wrap. To make beef extremely tender, marinate it in sparkling water with chopped onions and black pepper a few hours before cooking.

DAY 4

TOTAL: ~1260 KCAL | P: 130G | F: 49G | C: 61G

MEAL 1 (BREAKFAST)

Omelet: 1 Whole Egg + 3 Egg Whites + Handful of Spinach & Bell Peppers. 1 slice Toast.

260 kcal P: 22g F: 8g C: 22g

MEAL 2 (LUNCH)

Large Chicken Salad: 150g Chicken Breast + Mixed Greens + Cherry Tomatoes + 1/4 Avocado.

360 kcal P: 38g F: 14g C: 12g

MEAL 3 (SNACK)

1 Scoop Whey Protein Isolate + 1/2 Banana.

160 kcal P: 25g F: 1g C: 15g

MEAL 4 (DINNER) - ZERO CARB

150g Turkey Meatballs + 150g Zucchini Noodles (Zoodles) + Light tomato sauce.

480 kcal P: 45g F: 26g C: 12g

[PRO TIP] SUBSTITUTIONS & TASTE

Too lazy to grate zucchini? Swap them for Shirataki noodles (only 9 kcal per 100g, pure fiber to keep you full). For the meatball sauce, use crushed tomatoes (passata) mixed with dried basil, oregano, and salt. Avoid store-bought ketchup loaded with sugar.

DAY 5

TOTAL: ~1270 KCAL | P: 115G | F: 44G | C: 102G

MEAL 1 (BREAKFAST)

Avocado Toast: 1 slice Sourdough + 1/4 Mashed Avocado + 2 Poached Eggs.

340 kcal P: 18g F: 18g C: 24g

MEAL 2 (LUNCH)

Quinoa Bowl: 150g Grilled Chicken + 50g Quinoa + Chopped Cucumbers & Bell Peppers.

400 kcal P: 38g F: 6g C: 38g

MEAL 3 (SNACK)

150g Greek Yogurt (0%) + Cinnamon.

90 kcal P: 15g F: 0g C: 6g

MEAL 4 (DINNER) - ZERO CARB

150g White Fish (Sea Bass/Tilapia) + 150g Asparagus roasted with 1 tsp olive oil.

440 kcal P: 44g F: 20g C: 12g

[PRO TIP] SUBSTITUTIONS & TASTE

Swap quinoa for brown rice, couscous, or bulgur (gram for gram). Always squeeze lemon juice and sprinkle Herbes de Provence on white fish before baking—it removes the fishy smell and makes the texture incredibly tender. Add two rice cakes to your snack if you need more volume.

DAY 6

TOTAL: ~1320 KCAL | P: 122G | F: 50G | C: 103G

MEAL 1 (BREAKFAST)

Protein Oatmeal: 40g Oats + 1 Scoop Protein + 10g Almonds.

340 kcal P: 32g F: 10g C: 30g

MEAL 2 (LUNCH)

150g Lean Ground Turkey + 50g Basmati Rice + Green Beans.

410 kcal P: 34g F: 10g C: 40g

MEAL 3 (SNACK)

1 Green Apple + 15g Raw Almonds.

180 kcal P: 3g F: 8g C: 25g

MEAL 4 (DINNER) - ZERO CARB

150g Baked Salmon + Huge Green Salad + Lemon dressing.

390 kcal P: 33g F: 22g C: 8g

[PRO TIP] SUBSTITUTIONS & TASTE

Use zero-sugar flavor drops (like vanilla or caramel) when making your oatmeal to turn a basic diet meal into a restaurant-style dessert. Swap almonds for cashews or hazelnuts. Add a splash of low-sodium soy sauce to your ground turkey to keep it juicy.

DAY 7

TOTAL: ~1300 KCAL | P: 134G | F: 44G | C: 81G

MEAL 1 (BREAKFAST)

Scrambled: 2 Whole Eggs + 2 Egg whites + Cherry Tomatoes. 1 slice Sourdough Toast.

310 kcal P: 24g F: 12g C: 22g

MEAL 2 (LUNCH)

Chicken Fajita Bowl: 150g Chicken + 50g Rice + Sautéed Bell Peppers & Onions.

380 kcal P: 35g F: 6g C: 45g

MEAL 3 (SNACK)

1 Scoop Whey Protein Isolate in Almond Milk.

140 kcal P: 25g F: 2g C: 4g

MEAL 4 (DINNER) - ZERO CARB

150g Lean Beef Stir-fry with Broccoli and Soy Sauce (Low sodium).

470 kcal P: 50g F: 24g C: 10g

[PRO TIP] SUBSTITUTIONS & TASTE

For the fajita bowl, use Latin spices: cumin, dried coriander, chili pepper, and lime juice. It creates a massive thermogenic effect (boosts metabolism) and tastes amazing. Swap the beef for a tuna steak (150g) if you want pure protein with almost zero fat.

DAY 8

TOTAL: ~1240 KCAL | P: 115G | F: 41G | C: 98G

MEAL 1 (BREAKFAST)

150g Greek Yogurt (0%) + 50g Berries + 1 tbsp Chia Seeds.

220 kcal P: 18g F: 6g C: 22g

MEAL 2 (LUNCH)

Turkey Wrap: 120g Deli Turkey breast + Spinach + 1/4 Avocado in a Whole Wheat Tortilla.

380 kcal P: 28g F: 14g C: 32g

MEAL 3 (SNACK)

2 Rice Cakes + 1 tbsp Peanut Butter + 1 Scoop Whey Protein (in water).

320 kcal P: 30g F: 9g C: 22g

MEAL 4 (DINNER) - ZERO CARB

150g White Fish + 150g Green Beans + 1 tsp Olive Oil.

320 kcal P: 39g F: 12g C: 12g

[PRO TIP] SUBSTITUTIONS & TASTE

Warm up your tortilla on a dry pan before assembling to make it crispy. Swap deli turkey for canned tuna in water (1 can is perfect). To make white fish more exciting for dinner, use dried ginger and lemongrass powder for an Asian flavor profile.

DAY 9

TOTAL: ~1350 KCAL | P: 128G | F: 48G | C: 83G

MEAL 1 (BREAKFAST)

40g Oats cooked with water + 1 Scoop Protein Powder + Cinnamon.

260 kcal P: 30g F: 3g C: 28g

MEAL 2 (LUNCH)

150g Grilled Chicken + 150g Sweet Potato + Side Salad.

410 kcal P: 35g F: 5g C: 45g

MEAL 3 (SNACK)

2 Hard Boiled Eggs + Celery sticks.

160 kcal P: 12g F: 10g C: 4g

MEAL 4 (DINNER) - ZERO CARB

150g Lean Steak + 150g Asparagus.

520 kcal P: 51g F: 30g C: 6g

[PRO TIP] SUBSTITUTIONS & TASTE

Swap sweet potato for baked pumpkin—it has half the calories, meaning you can eat twice as much (a huge 300g portion!) to keep you incredibly full. Celery sticks for a snack help cleanse your palate and eliminate fake hunger signals. Crunch on them freely.

DAY 10

TOTAL: ~1240 KCAL | P: 126G | F: 51G | C: 67G

MEAL 1 (BREAKFAST)

1 Whole Egg + 3 Egg Whites Omelet. 1 Slice Sourdough Toast.

240 kcal P: 20g F: 6g C: 20g

MEAL 2 (LUNCH)

Shrimp Salad: 150g Grilled Shrimp + Huge Salad + 1/4 Avocado + Lemon Dressing.

310 kcal P: 35g F: 12g C: 15g

MEAL 3 (SNACK)

1 Scoop Whey Protein + 1/2 Banana.

160 kcal P: 25g F: 1g C: 15g

MEAL 4 (DINNER) - ZERO CARB

150g Turkey Meatballs + Zucchini Noodles.

530 kcal P: 46g F: 32g C: 12g

[PRO TIP] SUBSTITUTIONS & TASTE

Add some chopped spinach and a tablespoon of ice water directly into your raw turkey meatball mix—it makes them super soft and juicy inside. Not a fan of bananas? Swap for 2 kiwis, they are packed with Vitamin C and enzymes that perfectly help digest your protein shake.

DAY 11

TOTAL: ~1250 KCAL | P: 118G | F: 44G | C: 113G

MEAL 1 (BREAKFAST)

150g Greek Yogurt + 10g Almonds + 1 tsp Honey.

210 kcal P: 18g F: 6g C: 20g

MEAL 2 (LUNCH)

150g Chicken Breast + 50g Quinoa + Cucumber slices.

360 kcal P: 38g F: 5g C: 35g

MEAL 3 (SNACK)

1 Green Apple + 2 Plain Rice Cakes + 1 Scoop Protein (in water).

290 kcal P: 27g F: 2g C: 38g

MEAL 4 (DINNER) - ZERO CARB

150g Baked Salmon + Broccoli.

390 kcal P: 35g F: 22g C: 10g

[PRO TIP] SUBSTITUTIONS & TASTE

Always soak quinoa in cold water for 15 minutes before cooking, then rinse well. This removes saponins (which cause a bitter taste) and gives it a perfect nutty flavor. Sprinkle some garlic powder on your dinner broccoli for an extra kick.

DAY 12

TOTAL: ~1280 KCAL | P: 120G | F: 50G | C: 84G

MEAL 1 (BREAKFAST)

Avocado Toast: 1 slice Toast + 1/4 Avocado + 2 Poached Eggs.

340 kcal P: 18g F: 18g C: 24g

MEAL 2 (LUNCH)

150g Lean Ground Turkey + 50g Basmati Rice + Sautéed Peppers.

390 kcal P: 33g F: 10g C: 40g

MEAL 3 (SNACK)

1 Scoop Whey Protein Isolate in Almond Milk.

140 kcal P: 25g F: 2g C: 4g

MEAL 4 (DINNER) - ZERO CARB

150g White Fish + Mixed Green Salad + 1 tsp Olive Oil.

410 kcal P: 44g F: 20g C: 8g

[PRO TIP] SUBSTITUTIONS & TASTE

Swap rice for buckwheat, ptitim, or whole wheat pasta (cooked al dente). For a restaurant-style dinner salad dressing, mix: 1 tsp olive oil + 1 tsp lemon juice + 1/2 tsp whole grain Dijon mustard. Same calories, much better taste.

DAY 13

TOTAL: ~1310 KCAL | P: 130G | F: 47G | C: 86G

MEAL 1 (BREAKFAST)

40g Oats + 1 Scoop Protein + 50g Berries.

290 kcal P: 30g F: 4g C: 32g

MEAL 2 (LUNCH)

150g Chicken Breast + 150g Sweet Potato + Green Beans.

380 kcal P: 38g F: 5g C: 42g

MEAL 3 (SNACK)

2 Hard Boiled Eggs + Carrot sticks.

160 kcal P: 13g F: 10g C: 6g

MEAL 4 (DINNER) - ZERO CARB

150g Lean Flank Steak + Asparagus + 1 tsp Olive Oil.

480 kcal P: 49g F: 28g C: 6g

[PRO TIP] SUBSTITUTIONS & TASTE

Volume cheat code: Add 50-70g of liquid pasteurized egg whites to your freshly cooked hot oatmeal and stir quickly. It makes the oats incredibly creamy, increases the visual portion by 50%, and adds almost zero extra calories!

DAY 14

TOTAL: ~1230 KCAL | P: 115G | F: 52G | C: 73G

MEAL 1 (BREAKFAST)

2 Whole Eggs + 2 Egg Whites + Spinach. 1 slice Toast.

280 kcal P: 24g F: 12g C: 20g

MEAL 2 (LUNCH)

Shrimp Wrap: 120g Shrimp + Whole Wheat Tortilla + Salad.

340 kcal P: 30g F: 8g C: 35g

MEAL 3 (SNACK)

150g Greek Yogurt (0%) + Cinnamon.

90 kcal P: 15g F: 0g C: 6g

MEAL 4 (DINNER) - ZERO CARB

150g Baked Salmon + Zucchini side + 1 tsp Olive Oil.

520 kcal P: 46g F: 32g C: 12g

[CYCLE COMPLETED]

You have successfully finished the first 14 days! Your body has dropped excess water weight, and your stomach volume has visibly shrunk. Tomorrow morning, loop back to DAY 1 and continue this exact path until you hit your dream shape!

FINAL MODULE

ACTIVITY & SUPPLEMENT PROTOCOL

[ACTIVITY] CARDIO, WALKING & MOVEMENT

Diet is the absolute foundation of fat loss, but to shrink your waist extremely fast and get a flat stomach without loose skin, you must strictly follow this daily activity protocol:

- **Daily Step Goal:** Keep a target of 10,000 – 12,000 steps every day. This shouldn't be running, which heavily spikes appetite. Just regular, steady walking.
- **Incline LISS Cardio:** 4-5 times a week, either after a workout or fasted in the morning, walk on a treadmill on an incline. Parameters: Incline 6-8%, Speed 4.5 - 5.2 km/h. Duration: exactly 35-45 minutes.
- **Heart Rate Control:** Keep your heart rate strictly in the 115-125 BPM zone. This is the sweet spot where only subcutaneous fat burns without triggering cortisol (the stress hormone), which causes water retention in the lower belly.
- **Pro Tip:** Watch your favorite TV show or listen to a podcast ONLY while walking on the treadmill. Time will fly, and the habit will stick instantly.

[SUPPLEMENTS] SUPPLEMENTATION GUIDE

When in a caloric deficit, supplements are strictly necessary to keep your energy high, support women's health, maintain glowing skin, and completely eliminate water retention:

- **Omega-3 (High-Concentrate Fish Oil):** 3,000 mg daily with breakfast. Reduces cellular inflammation, accelerates lipolysis (fat breakdown), and keeps skin firm.
- **Vitamin D3 (Cholecalciferol):** 5,000 IU every morning with fats (like avocado or eggs). Regulates hormones, thyroid function, and directly impacts metabolism speed.
- **Magnesium (Citrate or Glycinate):** 400 mg strictly 30-40 minutes before sleep. Calms the nervous system, deepens sleep (the phase when fat burns), and completely eliminates morning puffiness.
- **Chromium Picolinate:** 200 mcg in the afternoon with your snack. Completely blocks sugar cravings by stabilizing your blood sugar levels.
- **Apple Cider Vinegar (Organic, with 'The Mother'):** 1 tbsp in a glass of warm water 15 minutes before your first meal. Stimulates stomach acid, eliminates bloating, and gives you a visually flat stomach from the moment you wake up.

FREE BONUS

4-WEEK HOURGLASS TRAINING PLAN

The secret body recomposition protocol: 12 workouts aimed exclusively at narrowing the waist, sculpting the back, and building an extreme glute pump.

EXECUTION RULES (MUST READ)

This plan is built on progressive overload. Do not chase weight at the expense of technique. Every rep must be strictly controlled. Your ultimate goal is to feel the target muscle working (Mind-Muscle Connection).

- **WARM-UP:** 5-7 minutes of incline walking on a treadmill (heart rate 110-120 BPM) + 2 sets of dynamic bodyweight lunges.
- **REST TIMERS:** Strictly follow the rest timings between sets (from 45 to 120 seconds). This directly dictates your hormonal response and fat oxidation rate.
- **BREATHING:** Always exhale powerfully on the hardest part of the movement (when you push or pull the weight).

WEEK 1: FOUNDATION & ACTIVATION

WORKOUT 1: GLUTES & HAMSTRINGS

FOCUS: GLUTES & HAMSTRINGS

1. BARBELL HIP THRUSTS

Shoulder blades firmly pressed into the bench, chin tucked to your chest (look forward), ribs pulled down. Perform an explosive upward thrust, and squeeze glutes hard for 2 seconds at the top. Knee angle strictly 90 degrees. Do not arch your lower back!

4 SETS 10 REPS 120s REST

2. ROMANIAN DEADLIFTS (RDLs)

Push your hips back as if closing a door with your glutes. Knees slightly bent, back perfectly straight. Dumbbells or barbell glide right along your thighs without leaving your legs. Maximize the stretch in the hamstrings.

4 SETS 10-12 REPS 90s REST

3. BULGARIAN SPLIT SQUATS

Front working leg planted, back foot resting on a bench. Lean your torso forward 30-45 degrees to shift all the load from your quads directly onto the glute muscle. Drop slowly, driving your front heel into the floor to stand up.

3 SETS 10 /LEG 90s REST

4. CABLE GLUTE KICKBACKS

Torso parallel to the floor. Kick back and slightly outward (at a 30-45 degree angle) to heavily target the gluteus medius (creates the side-booty curve). Smooth movement, absolutely no jerking with the lower back.

3 SETS 15 /LEG 60s REST

5. PLANK HOLDS

Rest on your forearms, elbows strictly under your shoulders. Squeeze your glutes hard and pull your belly button up to your spine. Keep your lower back flat, do not let your hips sag down.

3 SETS 45s HOLD 45s REST

WORKOUT 2: UPPER BODY SCULPT

FOCUS: BACK, SHOULDERS & POSTURE

1. WIDE GRIP LAT PULLDOWNS

Grip wider than your shoulders. Lean your torso slightly back. Pull the bar to your upper chest, actively squeezing your shoulder blades together. Elbows drive straight down. Creates the illusion of a narrow waist by building a V-taper.

4 SETS 12 REPS 90s REST

2. SEATED CABLE ROWS

Sit with a perfectly straight back, chest up high. Pull the handle to your lower stomach (navel). Imagine pinching a coin between your shoulder blades at the absolute peak of the contraction.

4 SETS 12 REPS 90s REST

3. SEATED DB SHOULDER PRESS

Sit on an upright bench. Keep elbows slightly tucked forward (45-degree angle to the body) to protect the shoulder joints. Press up powerfully, stopping just short of full lockout at the top.

3 SETS 10 REPS 60s REST

4. DUMBBELL LATERAL RAISES

Elbows slightly bent. Raise dumbbells out to the sides up to shoulder level. At the top, slightly tilt your wrists (pinky higher than thumb), like pouring water from a pitcher. Heavily isolates the medial deltoid cap.

4 SETS 15 REPS 60s REST

5. TRICEP ROPE PUSHDOWNS

Elbows are firmly pinned to your ribs and do not move throughout the entire set. Push the rope down, spreading the ends apart at the very bottom to tighten the back of the arms. Return the weight slowly.

3 SETS 15 REPS 60s REST

WORKOUT 3: QUADS & TIGHT CORE

FOCUS: QUADS & FLAT STOMACH

1. GOBLET SQUATS

Hold a dumbbell vertically with both hands against your chest. Back perfectly straight. Drop your hips straight down between your heels, knees tracking over your toes. Deep squat motion to target the front of the thighs.

4 SETS 12 REPS 90s REST

2. LEG PRESS (NARROW STANCE)

Place your feet close together and low on the platform. This completely shifts the focus to your quads. Push with your heels, and never lock out your knees at the top (keep them slightly bent for joint safety).

4 SETS 12-15 REPS 90s REST

3. LEG EXTENSIONS

Extend your legs with a powerful, controlled motion. You must make a mandatory 1-second hard pause at the top, bringing the muscle to an intense burn. Lower the weight slowly over 3 full seconds.

3 SETS 15 REPS 60s REST

4. BICYCLE CRUNCHES

Lying on your back, slowly crunch and twist, touching your elbow to the opposite knee. The other leg is fully extended parallel to the floor. Focus on twisting the waistline and working the obliques.

3 SETS 20 /SIDE 45s REST

5. LYING LEG RAISES

Place hands under your glutes to lock down your lower back (it must remain glued to the floor). Slowly lower straight legs down to a 15-20 degree angle from the floor. Lift back up using strictly your lower abs.

3 SETS 15 REPS 45s REST

WEEK 2: HYPERTROPHY & SHAPING

WORKOUT 4: GLUTE ISOLATION

FOCUS: GLUTE ISOLATION & SHAPE

1. B-STANCE RDLS

One working leg planted flat, the other stepped back on toes just for balance (B-stance). Perform a standard RDL. This completely isolates the working glute 100% without excessively loading your lower back.

4 SETS 10 /LEG 90s REST

2. DEFICIT REVERSE LUNGES

Stand with your front foot on a small elevation (a 5-10kg weight plate or a step platform). Step deep backward. The elevation creates an extreme stretch on the glute muscle at the very bottom of the movement.

4 SETS 12 /LEG 90s REST

3. CABLE PULL-THROUGHS

Stand facing away from the cable machine, rope attachment between your legs. Hinge forward with a straight back (like an RDL) to stretch the glutes. Stand up by forcefully squeezing the glutes and pushing your hips forward.

3 SETS 15 REPS 60s REST

4. SEATED ABDUCTOR MACHINE

While seated in the machine, lean your torso forward (45-degree angle) and hold the frame. This angle shifts all tension off the quads directly onto the gluteus medius. Drive your knees outward powerfully, return slowly.

3 SETS 20 REPS 45s REST

5. BODYWEIGHT FROG PUMPS

Lying on the floor, bring the soles of your feet together and drop your knees wide open (frog pose). Perform fast, pumping hip thrusts. Execute this without resting to completely burn out the glute muscles.

3 SETS 30 REPS 45s REST

WORKOUT 5: UPPER PUSH & ARMS

FOCUS: CHEST, SHOULDERS & ARMS

1. INCLINE DB CHEST PRESS

Bench set to a 30-degree incline. Elbows flared at a 45-degree angle from the body. Press dumbbells up and together (without clanking them). This visually lifts the upper chest and sculpts the collarbone area.

4 SETS 10 REPS 90s REST

2. KNEELING PUSH-UPS

Your body should form a perfect straight line from knees to head. Your chest should practically touch the floor. Elbows shouldn't flare out into a wide 'T' shape; keep them tucked closer to your ribcage.

3 SETS AMRAP (TO FAILURE) 60s REST

3. DUMBBELL FRONT RAISES

Alternately raise straight arms holding dumbbells directly in front of you, up to eye level. Keep your torso locked down tight—absolutely no swinging back. Perfectly sculpts the front of the shoulder cap.

3 SETS 12 REPS 60s REST

4. OVERHEAD TRICEP EXTENSION

Seated on an upright bench, hold one heavy dumbbell with both hands. Lower it deep behind your head to maximize the tricep stretch. Elbows must point straight up and stay close to your ears.

3 SETS 12-15 REPS 60s REST

5. DUMBBELL BICEP CURLS (SUPINATED)

Elbows pinned to your waist. Start with palms facing each other at the bottom. As you curl up, twist your wrists (supinate) so palms face the ceiling to peak the bicep contraction and create a beautiful arm line.

3 SETS 12 REPS 60s REST

WORKOUT 6: FULL LOWER BODY BURN FOCUS: FULL LOWER BODY PROPORTIONS

1. BARBELL BACK SQUATS

Barbell resting on your upper traps. Stance slightly wider than shoulders, toes pointed 30 degrees outward. Squat deep, below parallel, to maximize the stretch and engagement of the glutes and adductors. Keep your core braced.

4 SETS 8-10 REPS 120s REST

2. WALKING DUMBBELL LUNGES

Hold dumbbells by your sides and take long, wide steps. A wider step recruits significantly more glute and hamstring fibers. Gently touch your back knee to the floor without resting on it. Keep your posture tall.

3 SETS 20 STEPS 90s REST

3. SEATED LEG CURLS

Keep your hips locked firmly into the machine seat. Curl the weight down with a sharp, powerful motion, but extend the legs back up very slowly (3-4 seconds), deeply resisting the machine's pull.

3 SETS 15 REPS 60s REST

4. STANDING CALF RAISES

Stand in a calf machine (or hold DBs on a step). Drop your heels fully down for a deep loaded stretch, then power all the way up onto your toes, holding the peak contraction for one full second.

3 SETS 20 REPS 45s REST

5. RUSSIAN TWISTS

Sit on the floor, lean your back to a 45-degree angle. Hold a weight plate or a heavy dumbbell. Fully rotate your shoulders side to side, keeping your eyes fixed on the weight. Carves out the obliques tightly.

3 SETS 20 /SIDE 45s REST

WEEK 3: STRESS & SHAPE INTENSIFICATION

WORKOUT 7: GLUTE PEAK POWER

FOCUS: GLUTE PEAK POWER & DENSITY

1. HEAVY BARBELL HIP THRUSTS

Significantly increase the barbell weight. The rep count drops. This heavy compound lifting phase is absolutely essential for building true, dense muscle volume in the glutes.

4 SETS 6-8 REPS 120s REST

2. SUMO DEADLIFTS

Take a wide stance, toes pointed outward (sumo position). Arms hang straight down inside your knees. Stand up by driving your heels powerfully into the floor. Perfectly targets the inner thighs and lower glutes.

4 SETS 8 REPS 120s REST

3. SINGLE-LEG GLUTE BRIDGES

Perform lying on the floor, one leg extended straight up. Rest a dumbbell on the working hip crease. This forces each glute to work completely independently, erasing any muscular imbalances in your physique.

3 SETS 12 /LEG 60s REST

4. REVERSE HYPEREXTENSIONS

Lie face down on a bench or a GHD machine, hips hanging off the edge. Lift your straight legs up strictly using glute power. Do not over-arch your lower back at the top of the movement.

3 SETS 15 REPS 60s REST

5. DEADBUGS

Lying on your back, both arms and legs raised. Alternately lower your right arm and left leg toward the floor (and vice versa). Crucial rule: your lower back must remain completely glued to the floor. Ignites deep core layers.

3 SETS 12 /SIDE 45s REST

WORKOUT 8: SCULPTED SHOULDERS & ABS

FOCUS: DELTS & FLAT CORE

1. ARNOLD PRESS

Start with dumbbells in front of your face, palms facing you. As you press upward, seamlessly rotate your wrists so your palms face forward at the top lockout. This compound move hits all three shoulder heads efficiently.

4 SETS 10 REPS 90s REST

2. CABLE LATERAL RAISES

Perform side arm raises using a low cable pulley handle. The cable provides constant, relentless tension throughout the entire range of motion, carving out perfectly round, aesthetic shoulder caps.

4 SETS 12-15 REPS 60s REST

3. ROPE FACE PULLS

Set the pulley to eye level. Pull the rope attachment directly to the bridge of your nose, driving your elbows out wide and back. This is the #1 exercise for fixing posture and building the rear delts.

3 SETS 15 REPS 60s REST

4. CAPTAIN'S CHAIR LEG RAISES

Support your back and forearms in the rack. Pull your knees up to your chest, slightly tucking your pelvis upward at the peak. Simple hip flexion won't work—you must actively crunch the lower abs.

3 SETS 15 REPS 60s REST

5. SIDE PLANK DIPS

Hold a side plank on your elbow. Slowly drop your hip down until it almost touches the floor, then powerfully thrust it back up into a perfectly straight line. Builds a tight, snatched lateral waistline.

3 SETS 15 /SIDE 45s REST

WORKOUT 9: LOWER BODY HYPERTROPHY

FOCUS: SHAPING & TONING
PROPORTIONS

1. HACK SQUATS (OR FRONT SQUATS)

Use a narrow and low foot placement on the platform. Go as deep as your mobility allows. With your back fully supported by the pad, 100% of the tension is isolated onto the quads (the teardrop muscle shape).

4 SETS 10 REPS 120s REST

2. DUMBBELL RDLs

Focus entirely on maximizing the stretch at the bottom. Hold dumbbells slightly angled in a V-shape and glide them down your legs. Keep your back locked perfectly straight. Only your glutes and hamstrings do the work.

4 SETS 12 REPS 90s REST

3. SINGLE LEG EXTENSIONS

Perform the classic machine leg extension, but working strictly one leg at a time. This forces balance and corrects weaknesses. Squeeze the quad at the top lockout until it burns intensely.

3 SETS 12 /LEG 60s REST

4. ADDUCTOR MACHINE (INNER THIGHS)

Squeeze your legs together powerfully, hold the tension for one second, then let them open extremely slowly while completely controlling the weight. Tones and tightens the stubborn inner thigh gap area.

3 SETS 15-20 REPS 60s REST

5. AB WHEEL ROLLOUTS

An advanced core movement. From your knees, slowly roll the wheel forward while bracing your abs like iron. Pull back using your core contraction, not by pulling with your arms. Keep your lower back slightly rounded!

3 SETS 10-12 REPS 60s REST

WEEK 4: PEAK SCULPTING OVERLOAD

WORKOUT 10: GLUTE & CORE BURNOUT FOCUS: PUMP & METABOLIC OVERLOAD

1. SMITH MACHINE HIP THRUSTS (WITH PAUSES)

The Smith machine provides perfect lateral stability. Work under constant tension: at the absolute top of every single rep, hold a dead, hard pause for exactly 2 seconds. A massive burning sensation is guaranteed.

4 SETS 12 REPS 90s REST

2. CURTSY LUNGES

Step backward and cross the working leg diagonally behind your front leg, almost like a bow. Drop deep into the lunge. This movement phenomenally targets the outer glute tie-in and hip curve.

4 SETS 12 /LEG 60s REST

3. CABLE KICKBACKS (DROP SETS)

Attach the ankle strap. Perform 10 perfect heavy reps, immediately drop the weight stack by 30-40%, and pump out 10 more reps to complete failure without stopping. Repeat the whole sequence for the other leg.

3 SETS 10 + 10 REPS 60s REST

4. V-UPS

Lying flat on your back like a tight string. Simultaneously raise your straight legs and your torso, aiming to touch your toes with your fingers. Form a sharp 'V' shape. This requires an explosive full-core contraction.

3 SETS 15 REPS 45s REST

5. MOUNTAIN CLIMBERS

A brutal metabolic finisher. Get into a push-up position. Rapidly and alternately drive your knees to your chest, simulating a high-speed sprint. Keep your hips locked low and do not arch your back. Work strictly on the clock.

3 SETS 40s WORK 45s REST

WORKOUT 11: FULL UPPER BODY DENSITY

FOCUS: UPPER BODY TONE & DEFINITION

1. ASSISTED PULL-UPS (OR NEGATIVES)

Use an assisted machine or a heavy resistance band. The primary focus is the negative (eccentric) phase: pull yourself up powerfully, then lower yourself down extremely slowly (count to 4). Builds genuine, elegant back strength.

4 SETS 6-8 REPS 120s REST

2. SINGLE-ARM DB ROWS

Support one knee and hand on a flat bench. Keep your torso parallel to the floor. Do not pull the dumbbell up to your chest; pull it back in an arc toward your hip pocket. This shifts the load away from the biceps directly onto the lats.

3 SETS 12 /ARM 90s REST

3. DUMBBELL BENCH PRESS

Classic flat bench press. Shoulder blades retracted tightly, maintaining a slight natural arch in the lower back. Elbows flare at a 45-degree angle. Tightens the pectoral muscles and front deltoids.

3 SETS 10 REPS 90s REST

4. LATERAL RAISES (HIGH REP BURNOUT)

Grab very light dumbbells (2-3 kg). The absolute goal is 20 perfect, clean reps with zero swinging or momentum. Floods the shoulders with blood, creating top-width to heavily contrast against a narrow waistline.

3 SETS 20 REPS 60s REST

5. OVERHEAD TRICEP ROPE EXTENSIONS

Stand facing away from a high pulley, grab the rope from behind your head. Extend your arms straight out, keeping your elbows tucked close to your head. Deeply stretches and trains the long head of the triceps for tight arms.

3 SETS 15 REPS 60s REST

WORKOUT 12: LOWER BODY FINAL THRESHOLD

FOCUS: FINAL STRENGTH & SHAPE THRESHOLD

1. HEAVY BARBELL RDLS

The final heavy load for your posterior chain. Use a barbell. Keep your back rock solid, pull the weight up using purely the force of your glutes and hamstrings. Squeeze glutes extremely hard at the top lockout (do not lean back!).

4 SETS 8 REPS 120s REST

2. WALKING LUNGES (WEIGHTED)

Grab heavier dumbbells than usual. Keep your torso strictly upright to evenly distribute the brutal load between your quads and glutes. Complete 24 total steps without stopping or dropping the weights.

4 SETS 24 STEPS 90s REST

3. HIP THRUST PULSES

Thrust your hips to the top lockout (parallel to the floor) and do not lower them all the way down. Perform short, rapid pulsing bounces with only 10-15 cm of range. This maximizes the muscle's time under tension.

3 SETS 20 PULSES 60s REST

4. JUMP SQUATS

Bodyweight only. Squat down strictly to parallel and explode upward into a high jump. Land extremely softly, absorbing the impact entirely through bent knees to protect the joints and ligaments.

3 SETS 15 JUMPS 60s REST

5. CABLE WOODCHOPPERS

Set the pulley to the highest notch. Pull the handle diagonally down and across your body, heavily twisting your torso (like chopping wood). Phenomenal rotational move for a rock-solid core and chiseled obliques.

3 SETS 15 /SIDE 45s REST
